Art Unit: 1631

Each of the rejections in the Office action mailed October 2, 2003 is withdrawn in view of applicants' response filed April 18, 2003 and the Declaration under 37 CFR § 1.132 filed April 18, 2003 (it is believed that the Rule 132 declaration may have been intended as a Rule 131 declaration (*e.g.*, see MPEP 715)).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States.

Claims 1, 2, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by any one of Wachsman et al (Vaccine 10 (7), 447 (1992)), Rooney et al (Reviews of Infect. Diseases 13 (Suppl. 11), S898 (1991)), Aurelian et al (Reviews of Infect. Diseases 13 (Suppl. 11), S924 (1991)), or McDermott et al (Virology 169: 244 (1989)). Each one of Wachsman et al, Rooney et al, and Aurelian et al discloses the induction of an immune response in mice using HSV gD protein encoding DNA contained within vaccinia viral vectors. McDermott et al discloses the production of an immune response in mice using HSV gB protein encoding DNA in an adenovirus vector. For example, see the abstract of each of the references. The claims are broad enough to embrace the subject matter disclosed in any one of the references. Limiting the claims to exclude HSV sequences contained in viral vectors would be sufficient to overcome this rejection.

Claims 3-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-13 are allowable over the prior art of record.
